INDUSTRIAL SUPER DUTY DEGREASER

- 100% Solvent Free
- Non-Butyl
- 100% Readily Biodegradable
- Dilute with Water to Suit
- Non-D.O.T. Regulated
- Non-Toxic
- Non-Flammable
- Outperforms Dangerous Solvents
- Non-Staining

The Renovo line of products employs the most advanced developments in green technologies combined with EMS' patented acid and solvent replacements. The resulting products outperform dangerous chemicals in dozens of industries.

Renovo HD is unlike any industrial degreaser on the market. Its superior degreasing power comes from EMS' patented BioSyn, which safely lifts grease from any surface without the use of solvents. As such, it easily removed petroleum-based oils and lubricants.

Other products with the power of Renovo HD are solvent or butyl based or work by emulsifying the grease from the top of the deposit down to the surface where it lies. Renovo encapsulates each hydrocarbon molecule, lifting it from the surface. This means Renovo does not break down the hydrocarbons to where they absorb water, take on weight and sink to the bottom of a grease trap or containment unit. The grease pulled away by Renovo HD remain in its original form.

Renovo HD is 100% readily biodegradable in less than 10 days, meeting the EPA's direct release requirement. It is non-flammable, non-toxic, non-irritating and with its triple-zero HMIS score, you can store and use it however you wish.

Renovo HD can be diluted to suit a number of uses, making it a cost effective way to go green.
